The **ozz-helpers** package[*]

oZzMoDiA

June 11, 2018

Abstract

ozz-helpers provides various functionality like setting one of the themes provided in this package as well as adding preliminary version annotations or changing the font of the document to a more screen readable one.

Contents

1 Package Options

final   The `final` option can be used to tell the **ozz-helpers** package, that this is the final version of the document. If this is option is not defined a preliminary version watermark is added to each page. Additionally todonotes is enabled. If this option is not enabled, todonotes will be disabled and the watermark will vanish.

```
1 \newif\iffinal
2 \finalfalse
3 \DeclareOption{final}{
4   \finaltrue
5 }
```

screenreadable   The `screenreadable` option sets the font to one more suitable for reading on a screen.

```
6 \newif\ifscreenreadable
7 \screenreadablefalse
8 \DeclareOption{screenreadable}{
9   \screenreadabletrue
10 }
```

```
11 \ProcessOptions\relax
```

---

[*]This document corresponds to ozz-helpers ?, dated ?.

2 Option Effects

```
12 \iffinal
13   \RequirePackage[disable]{todonotes}
14 \else
15   \RequirePackage{prelim2e}
16   \RequirePackage[
17     color=orange,
18     textsize=tiny
19   ]{todonotes}
20 \fi

21 \ifscreenreadable
22   \RequirePackage{cmbright}
23 \else
24 \fi
```
